Structural Walling Systems

## ABOUT US

*Achieving excellence for each client, every time, bringing their vision to reality.*

Murs Projects Pty Ltd is a highly experienced, resourceful contractor of supply and installation of structural walling systems focused on the successful and efficient delivery of customers projects.

We employ proactive, problem-solving and a collaborative approach like-minded people to build success through alignment with our customer's objectives and culture. Versatility, ingenuity, and persistence are the foundation of our growth.

## OUR REPUTATION

*An integrated respect for safety, quality and each other.*

Murs Projects diverse, skilled team of professionals' work all over Australia, providing the best service and quality to suit our clients' needs and expectations.

Our specialists are highly trained and well respected within the industry. With their keen eye for detail, they offer expert advice to suit your project and always aim to deliver our work to you on time and within budget.

Strong commitment to leadership and hard work is reflected in all our projects. We commit ourselves to complete all projects within the timeline set with our clients. We use high quality equipment to ensure that all jobs are done quickly while also giving attention to detail, ensuring each task is completed correctly every time.

MURS PROJECTS

# TRUSTED INSTALLERS

*Skilled in the installation of permanent formwork, our high standard of delivery is consistently proven.*

Created and developed in Australia by professional engineers and certified by the University of NSW and the CSIRO, the Dincel Construction System is an internationally patented permanent polymer formwork for walls and columns. When filled with concrete, produces an economical, strong, durable structure.

AFS Rediwall is a PVC permanent formwork walling system. Its precision-extruded components simply snap or slide together easy interconnecting for rapid installation achieving a consistently clean, even and water-resistant surface that often doesn't require any finishing. The system is ideal for basements, columns, party and blade walls, lift/stair cores, retaining walls and retention tanks.

**PERMAFORM**  
QUICK ▶ STRONG ▶ STRAIGHT

We are also pleased to be part of the Master Builders Association group who provide expert advice in industrial relations, workplace health and safety, legal and contracts, training and government regulation/legislation ensuring we are represented across all sectors within the building and construction industry.

## WE'RE COVERED

*Murs Projects is fully insured for the following:*

### Safety

We pride ourselves on being careful but if something does go wrong, we're insured for all public liability and Workers Compensation.

### Quality

All our work consistently meets the very strict requirements of Occupational Health & Safety and Work Cover New South Wales.

### Certification

Every one of our valued employees at has completed the OH&S & White Card course as required by New South Wales legislation.

## DIGITAL PRESENCE

*A communications hub and updated gallery of some of our finest work.*

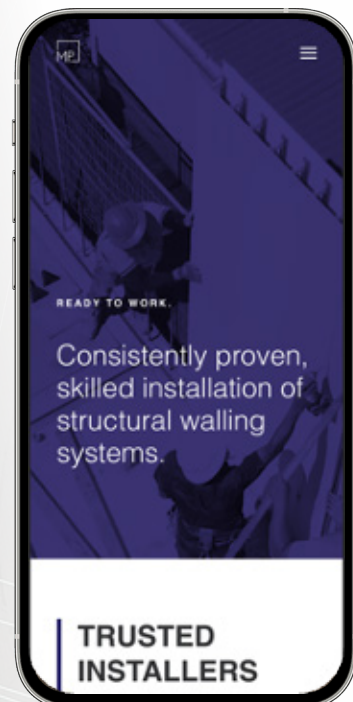

Our website acts as a central hub for prospective and existing clients to learn more about who we are. It provides access to this document; a dynamic source of information that's updated with every completed project.

Additionally, our friendly team is easy to reach with email and call functions directly from the website itself.
